

SYMANTEC. CLOUD EMAIL & WEB SECURITY

Unparalleled email and web threat protection from the world's leading cyber security company

WHAT IS SYMANTEC.CLOUD EMAIL & WEB SECURITY?

Defend your customers' confidential and sensitive data with unparalleled email and web threat protection from Symantec. As one of the world's largest malware research organisations, Symantec is a global leader in security and is backed by the industry's most secure service level agreements. With an easy to use

web-based management portal, Symantec.cloud Email & Web Security blocks 99% of spam before it reaches your customer's mailbox, defends against both known and unknown cyber threats and delivers a GDPR-ready solution for compliance.

COMBINES GLOBAL INTELLIGENCE WITH ADVANCED SCANNING

With 568,000 web attacks per day and \$5 billion (£3.7 billion) lost to financial email fraud over the last three years, protecting critical business data against cyber threats is vital. Symantec's Global Intelligence Network is built upon the key information that millions of desktops, servers and networks house when they

run any Symantec security product. This intelligence, combined with Sceptic Advanced Scanning technology, allows the Symantec.cloud family of products to learn from what it sees and to consider how any malicious content could be applied in a harmful way, providing protection immediately.

SIMPLE, INTUITIVE USER EXPERIENCE FOR SECURITY ADMINS

With an easy to use admin console, security administrators can easily deploy and manage their customers' settings without having to configure a complex solution. There's no need to enforce update policies as Symantec.cloud Email & Web Security is

continually upgraded to the latest software, plus it's built to prevent data leaks and ensure compliance with regulations through granular DLP (Data Loss Prevention) and encryption controls.

WHY CHOOSE SYMANTEC.CLOUD EMAIL & WEB SECURITY?

Benefits for resellers:

EASY TO DEPLOY AND MANAGE

Assign licenses in a pinch through one single online portal and deploy Symantec.cloud to your users with easy manageability.

CUSTOMISE SETTINGS FOR EACH CUSTOMER

Enable policies and set highly configurable settings for each customer's inbound and outbound email, allowing you to personalise their protection and keep your customers happy.

EXCLUSIVE PARTNER DISCOUNT

Purchase Symantec.cloud at an exclusive price below the RRP so you can build maximum profit.

ENABLE GDPR READY DLP POLICIES

Set policies that are GDPR ready, access email impersonation control settings and protect your customers from spoofing attacks with SPF and DMARC policies that are easy to setup and manage.

EASY ON, EASY OFF BILLING

You won't be tied into any contracts when provisioning Symantec.cloud with us. Plus, you can test the products for free in your Cloud Market up until the date of your first bill.

WHY CHOOSE SYMANTEC.CLOUD?

Benefits for end users:

BUILT-IN AV ENGINE FOR ULTIMATE PROTECTION

Protects and defends user's mailboxes against cyber threats, including zero-day threats, with industry-leading security protection.

BLOCKS 99% SPAM

99% spam is captured before it reaches the mailbox, with 100% of emails delivered and 100% uptime availability, ensuring confidence in the software.

EASY CLICK FOR EMAILS

Supports users when they click an email link with speedy background checks to ensure link credibility and safe web browsing.

QUICK EMAIL AND WEB CONTENT SCANS

Symantec scans an email within 60 seconds and identifies whether it houses malicious content, while web content is scanned within 100 milliseconds, leaving you to maximise business productivity.

GOVERNMENT-BACKED PROTECTION

Symantec is used by many UK banks and the UK Government, so you can rest assured you're using the best email protection software on the market.
